

## Soft, strong and seamless

DeLaval cow mattress M40R

**Your solution – every day**

Let your cows enjoy pasture softness in the barn. Cows get up and lie down about 20 times a day – encourage their natural behaviour and watch the well-being of your herd and finances improve.

### **Bring the pasture into your barn**

A dairy cow puts most of her weight on her front carpal joints as she lies down. If that pressure causes pain, she will remain standing. But if your cow stands for too long, her natural behaviour will be disturbed: she will eat and drink less and her feed utilization will suffer. This will result in less milk.

Cows experience well-being when they can rest at least 12 hours a day

and get up whenever they need to. When cows behave naturally, blood circulates properly, they are less stressed, their digestion works better and they produce more milk. Optimal cycles of rising and lying also help the recovery of foot lesions.

DeLaval cow mattress M40R is designed to encourage your cows to lie down and get up easily, so that they can behave as naturally as if they were out in the pasture.

**Your DeLaval dealer**

**Cut your costs**

Easy lying and rising, good hygiene, dryness and slip-resistant bedding, combined with the right balance between eating, drinking and walking mean long-term cow comfort. But, of course, cow comfort does not only benefit your cows: improved milk yield also means higher profits. In addition, you gain from reduced treatment charges, while optimal feed utilization cuts the cost of feedstuff. DeLaval offers you and your herd all these benefits with our reliable, robust and cost-efficient mattress, DeLaval M40R.

**Reliable performance**

This well-proven, rugged mattress offers cow comfort you can rely on. The 8-mm-thick top-cover features a robust fabric layer and an easy-to-clean surface. The specially developed latex foam underneath the mat is durable and elastic to

give your cows a consistently soft resting place. The top-cover together with the latex foam gives you a soft, strong and seamless mattress solution which is easy to install. DeLaval M40R is also slip-resistant thanks to a light grip pattern on the top-cover and because the mattress is soft, which allows the cow's claws to sink into it.

**Take full advantage**

- Long-term comfort means long rest times, relaxed cows, good milk yield and increased profits.
- The top-cover of DeLaval M40R is seamless. This provides better hygiene, lower vet costs and easier cleaning. Mould growth is prevented due to the seamless top-cover and because the latex foam is enveloped in plastic.
- The M40R is easy to install. Simply lay the plastic foil and latex foam with the cover on top. Fix it at the

back and front of the cubicle and then to the sides of the cubicle row.

You know your farm and what decisions need to be made. We help you run your farm your way by providing your solutions, every day.

Technical data	Size	Material	Thickness
M40R foam	120 x 150 cm 120 x 170 cm	Polyurethane/latex	30 mm
M40R top-cover	On rolls	Rubber	8 mm
