Have you ever seen a cow smile?

DeLaval pioneered and patented the swinging cow brush. Our unique design lets it swing freely onto the cow's back or head, over and along her sides, making it essential for cow comfort. With DeLaval swinging cow brush, every cow in your herd can groom herself all around.

Good, better, best
The third generation of our swinging cow brush has a robust and rounded frame that can swing and rotate the brush securely – for grooming cows on request 24 hours a day, 365 days a year. Two pivot points, one at either end of the curved arm, improve the grooming angles for smoother, even more cow-friendly movement.
Your cow comfort – your profit
The DeLaval swinging cow brush lets your cows groom themselves with bristles that are the right length and firmness – stimulating blood circulation and helping to improve cow health and performance. Research has shown a reduction in clinical mastitis and an increase in milk production from cows using the DeLaval swinging cow brush1.

Safety and performance
The unique design of our swinging cow brush has safety built in. It rotates at a safe, cow-friendly speed and will immediately stop if there is resistance. DeLaval swinging cow brush has sensitive overload protection against overheating and a significantly lower working temperature than the previous model. It also meets the protective criteria of IP55.

Saves energy
The energy-saving automatic on/off control starts the brush rotating on demand and stops it within 10 seconds after use. The new design is also energy efficient using less power than previous models.

Improves cow traffic – and comfort
Minimal installation space is needed for the brush, and it helps cow traffic flow when installed in the right place. It prevents cows from hurting themselves by scratching on any available surfaces. One brush can efficiently groom up to 60 cows, keeping them cleaner, healthier and more comfortable. And this brush operates more quietly than previous models, to help keep cows calmer, less stressed.

Easy to install and maintain
DeLaval swinging cow brush comes pre-mounted so it is easy to install on a wall or post and is easy to maintain. The brush cylinder can be removed for replacement or thorough cleaning.

Benefits:
• Grooms cows all over
• Essential for cow comfort
• Improves cow health and welfare
• Improves herd performance
• Easy to maintain and keep clean
• Low energy consumption

Technical data
Rotating speed: 31 rpm for 110 V
Rotating speed: 26 rpm for 230 V
Automatic on/off – stops 10 sec after use
IP55 motor protection
Overload protection
Brush unit with 7” long bristle
Brush diameter: 19.6”
Width: 19.6”
Length: 39.3”
Height: 51.9”
Weight: 154 lbs.

DeLaval swinging cow brush is part of our commitment to Sustainable Dairy Farming: solutions that meet environmental challenges, respect animal welfare and benefit customers and society.
